6.5.1.3 Release Notes

Prepared - 2/6/11 5:42 PM

Release Notes

Issue #	Category	Found In Release	Module	Title	Release Note
228546	Feature Enhancement	N/A	API & CLI	Support for Alternative User ID now included within the CLI and API	The CLI commands evadd2group and evadduser have been updated to allow them to use the alternative login ID as well as the normal user ID.
228660	Feature Enhancement	N/A	Add & Edit	Remove rows which have no visible fields from being rendered on add / edit layouts	With the increasing use of Ajax to handle the rendering on forms, we have introduced the capability to automatically suppress any row which has no visible fields. No user interaction or setup is required.
228662	Feature Enhancement	N/A	Add & Edit	Improved performance of Ajax requests on complex and large forms	Significant improvements to the time it takes to handle Ajax requests on large and/or complex forms have been made. This is achieved by compressing the data returned from the server. A new behavior setting named RESPONSE_COMPRESSION_THRESHOLD has been introduced to control this mechanism. A value of 0 for this setting means that no compression is made. A positive integer indicated the number of kilobytes of data above which the compression is introduced. Given that that the compression begins to make a significant improvement, even with relatively small returns of data, the default is provided as 1. Note that this setting is not used if ExtraView detects that the browser is Internet Explorer, with a version number lower than 8. This is because there is a sigificant bug in earlier versions of Internet Explorer, which actually result in even poorer performance although the data returned is compressed.
230649	Feature Enhancement	N/A	Administration	The default font size for a new user is now set to "medium"	Previously, the text size default was small.
230450	Feature Enhancement	N/A	EV Mail	Ability to add the original email submission from EVMail to the issue as an attachment	For some purposes it is useful to store the original email that is received by the EVMail task as an attachment to the issue. A new property named EVMAIL_ATTACH_EML has been created that can be set in the properties file for EVMail.
230459	Feature Enhancement	N/A	Search / Report	Optionally suppress report header / footer information on scheduled reports	Generated reports include a list of the filters that were used to generate the report at their head, and some reports (depending on the report output) also contain a count of the number of records. Depending on the context of the recipient of scheduled reports, this information sometimes did not mean anything (e.g. a guest user receiving a scheduled report with several filters on fields to which they did not have any access or context), so a new option to suppress the filters has been introduced when reports are being scheduled.
228577	Product Bug	6.5.0.2	Add & Edit	Date and time issues with calendar and time zones	Time zone conversion where users used the full date with time format would not always convert the date correctly. This has been fixed.

Release Notes

Issue #	Category	Found In Release	Module	Title	Release Note
228722	Product Bug	6.5.1.1	Add & Edit	Could not add any new issues into database	After upgrading from the 6.5.1.1 minor release it was not possible to add any new issues to the database, when the add layout did not contain a repeating row layout. The ability to add multiple repeating rows to layouts caused a problem when no repeating row layouts were present. This has been fixed.
230603	Product Bug	6.5.0.1	Add & Edit	FireFox: Cursor was not initially visible in Users Lookup dialogue	This only happened in the Firefox browser. Problem has been fixed.
232150	Product Bug	6.5.1.2	History	History screen mixed up order of repeating records when there were more than 10 repeating row fields within an issue	This happened because an alphanumeric sort was used, as opposed to a numeric sort. This has been fixed.
230694	Product Bug	6.5.1.2	Import and Export	XML Export/Import did not successfully migrate Scheduled Reports	Problem has been resolved.
228512	Product Bug	6.5.0.2	Notification	Email templates did not always choose to use the .txt version for plain text emails	This was a bug which occasionally affected email templates with a type of text only. It was fixed.
230451	Product Bug	6.5.1.1	Rules Engine	Business Rules with list assignments to {null} would not compile	This problem was introduced in 6.5.1.1.1 and was fixed. It only affected rules where a null value was assigned to a list field.
230627	Product Bug	6.5.1.1	Rules Engine	NullPointer in Rule.java has been fixed	This was connected to running escalations and then seeing a null pointer in the log file, but with no rules being executed. This bug has been fixed.
228515	Product Bug	6.1.4.1	Search / Report	A PDF report set in layout container did not display all records consistently for an issue with related records	This occured when the related records contained the same values within subsequent records. Only the first related record with its values was rendered. The problem has been fixed.
228707	Product Bug	6.5.1	Search / Report	Scheduled Reports - "Error on page" was displayed when selecting a user role from the select list	This was a minor problem that has been fixed.
230481	Product Bug	6.2.4	Search / Report	* None * value for query filter disappeared when editing saved report	This bug was related to popup User display type fields only. This problem was fixed.
231270	Product Bug	6.5.1.2	Search / Report	Invalid calendar date java.lang.Exception: Invalid calendar date was being thrown	This only occured when a user had the "time in 24 hour format" set and they were performing a time-base query between two dates. This bug was fixed.
232086	Product Bug	6.5.0.2	User Custom	ucRenderListValues UserCustom exit did not always work with assigning default value for fields in selectedVals HashMap	This has been fixed.

Count: 19 records
