6.5.1.6 Release Notes

Prepared - 5/23/11 3:49 PM

Release Notes					
Issue #	Category	Found In Release	Module	Title	Release Note
235870	Feature Enhancement	N/A	Notification	Allow email templates to use the current user's email address for the return address, as opposed to using the ExtraView AD_HOC_EMAIL_FROM_ADDRESS setting	This new feature simplifies the response to ad-hoc emails so that a template can set up the return address to the person creating the template as opposed to replying to the ExtraView application.
235640	Feature Enhancement	N/A	Search / Report	New ability to break lines in Header/Footer sections of Container Reports	The tag can now be used within the header and footer sections of container reports.
235869	Product Bug	6.5.1.2	Calendar	Calendar reports did not take the user's time zone into account for the display	This was a bug which was fixed.
236070	Product Bug	6.5.1.3	General code issues	Session issues with very large databases and many users	With large systems, with hundreds of active users and many transactions being entered and updated on a daily basis, it was found that small sessions were sometimes being created, and neither used nor deleted. After a period of more than a week, this build up of sessions led to a lack of resources in the server. This has been fixed.
235970	Product Bug	6.5.1.3	Home Page	RC1 session expiry error when editing an issue on the Home Page after refreshing a report	This only happened in Internet Explorer. The problem has been fixed.
235742	Product Bug	6.5.1.3	Import and Export	Metadata Export from MySQL database would sometimes take an excessively long time	This was an occasional issue with MySQL databases. The export of MySQL databases should now take approximately the same time as for other databases.
236495	Product Bug	Undefined Queue	Import and Export	XML export failed with 'missing expression' error	This was related to a specific customer's data and was fixed.
235817	Product Bug	6.5.1.3	Perforce Integration	Perforce Integration did not work as expected with repeating rows	This was fixed.
236311	Product Bug	6.5.1.5	Rules Engine	Link rule directives did not work with <Text field>=<List field> parameters	The mapping of text fields to list fields worked for onchange directives, but not when being used within link directives. Thia has been fixed.
236254	Product Bug	6.5.0.2	Search / Report	Standard Query filters had changed how they treated the DATE_CREATED_SINCE field	The filter operator for _SINCE fields was inadvertently changed to "equals" from the "less than or equal to" operator. This has been fixed.
