

# Release Notes for ExtraView 11.0.1

Date: November 3, 2016

ExtraView 11.0.1 Release Notes  
Feature Enhancements

Module: Layout Rendering		
Issue #	Title	Release Note
334264	VISIBLE IF now supported on Relationship Issue Displays	This is a new configuration option that allows the VISIBLE IF layout cell attribute to be defined on Related Issue Displays. The functionality includes the ability to place the new attribute on buttons on the layout. This functions when the RID is placed within Add, Edit screens, Quicklists and Detailed Reports
Count: 1 rows		

Module: Search / Report		
Issue #	Title	Release Note
334617	Reports within Dashboard reports are now sized more accurately	Dashboard reports are now drawn more accurately with respect to the dimensions specified within the report editor. Specifically, if you include summary / matrix reports alongside charts, and set the same width and height for each report, then the sizing will be accurate.
Count: 1 rows		
<b>Total Count: 2 rows</b>		

ExtraView 11.0.1 Release Notes  
Fixed Bugs

Module: Add & Edit			
Issue #	Found in Release	Title	Release Note
334393	11.0	Session was not terminated when logging in automatically and closing browser	There is a new parameter to API calls named ev_signoff. When the behavior setting named AUTO_SIGNOFF_ON_USER_EXIT is set to YES and this parameter is added to API calls, then the user's session is terminated after completion of the API command.
			Count: 1 rows

Module: Administration			
Issue #	Found in Release	Title	Release Note
334325	10.2	Setting the role when a user self-registers their account details	When a user was created by the self-registration process, it was created using the setting in DEFAULT_USER_ROLE. This should use the LIMITED_USER_ROLE setting. In most circumstances these are the same value, therefore this is a rare occurrence. The correct value is now applied.
			Count: 1 rows

Module: Business Rules			
Issue #	Found in Release	Title	Release Note
334535	11.0.1	Multi select popup fields were post-pending values when set in rules	This fix differentiates between the use of the "=" operator as opposed to "+=" as an operator when used with multi-valued list fields. The "=" operator now replaces the value whereas the "+=" operator appends the value to the existing values.
			Count: 1 rows

Module: Search / Report			
Issue #	Found in Release	Title	Release Note
334534	11.0	Hyperlinks within formatted Excel output	When outputting a report to formatted Excel, it appeared that there would be clickable links to URLs embedded within the text. This link requires JavaScript to be available, but this is not supported within Excel. The decoration to indicate that the text is a link has been removed so there is no ambiguity.
334492	11.0	No results were displayed in a PDF report that contained malformed HTML within the text within issues	When presented with issues that contained malformed HTML, PDF reports would not output any results. Now, as far as is possible, the malformed HTML is ignored and the report is generated.

ExtraView 11.0.1 Release Notes  
Fixed Bugs

327607	10.2	Drag and drop functionality has been added to the Document Repository	Drag and drop functionality is now supported on the report screen within the document repository. Note that you must have the appropriate permissions and that you may not alter a document from a personal to a public document or vice versa.
