Release Notes for ExtraView 11.0.2

Date: November 14, 2016

ExtraView 11.0.2   Release Notes
Feature Enhancements

Module: Mobile Client		
Issue #	Title	Release Note
334860	The mobile client can bypass the traditional Sign On screen for direct access to add screens within installations	The purpose of this is to provide a configuration where users can add issues to the ExtraView server from a mobile browser, while bypassing the traditional sign on screen. This is achieved through the server configuration of buttons that appear on the sign on screen in addition to, or as an alterative to, the normal sign on screen. These buttons use a secure API call to replace the sign on, taking the user directly to a screen internal to ExtraView.

Module: Add & Edit

Issue #	Found in Release	Title	Release Note
334393	11.0	Session was not terminated when logging in automatically and closing browser	There is a new parameter to API calls named ev_signoff. When the behavior setting named AUTO_SIGNOFF_ON_USER_EXIT is set to YES and this parameter is added to API calls, then the user's session is terminated after completion of the API command.

Module: Search / Report

Issue #	Found in Release	Title	Release Note
335186	11.0.1	Reports output to PDF within the Oracle Weblogic application server did not generate	This problem was fixed.
327996	9.0.4	formatted excel output prints output across multiple rows of cells	Text Area / Log Area and HTML Area fields were using a new row within the spreadsheet when a new paragraph was started, when outputting the report to a formatted Excel spreadsheet. This has been fixed so that the entire field fits within a single cell of the spreadsheet.
			Count: 2 rows

Module: XML Import and Export

Issue #	Found in Release	Title	Release Note
335091	N/A	XML Import progress bar problem	The progress bar displayed within a browser was not reliable and did not always reflect accurate progress of the XML import procedure. This has been fixed.
