Release Notes for ExtraView 22.1.1

Mar 8, 2023

Feature Enhancements

Module: Add & Edit		
Issue #	Title	Release Note
409286	New ability to prompt the user for required fields when triggering save/update actions via buttons on add and edit screens	With the relatively new feature of action buttons within add and edit screens, there is an enhancement that allows the screens to prompt the user for missing required fields when one of these action buttons is clicked.

Module: Administration		
Issue #	Title	Release Note
408908	The "prompt=consent" property has been removed from OAuth token requests	This is not required
		Count: 1 rows

Module: Search / Report		
Issue #	Title	Release Note
409206	Updating an issue from a multi-page report lost the active page	A feature to auto refresh the report output following a drillldown and edit operation proved to not always act the way all customers required, with some customers preferring the pre-existing method of not refreshing the report. A new personal option has been introduced to allow each user to either auto-refresh the report output or to retain their existing results after a drilldown altered an issue.
