7.0.1 Release Notes

Prepared - 11/29/11 4:58 PM

Release Notes					
Issue #	Category	Found In Release	Module	Title	Release Note
241995	Feature Enhancement	N/A	Administration	Simplify presentation of the task management screen	Previously, this screen displayed all running tasks, even though some were not controllable by the administrator and were only used for internal purposes. The presentation has been simplified to only display tasks with which the administrator may interact.
241566	Feature Enhancement	N/A	BatchMail	Allow users to specify secure SMTP port 587 when configuring BatchMail	There are two new BatchMail settings. The MAIL_PORT and the TRANSPORT may now be specified.
242671	Feature Enhancement	N/A	General code issues	Improvement to the way in which very large numbers of Projects are handled	Typically the PROJECT field is used to define a small number of projects within a Business Area. Occasionally, administrators may want to have hundreds or thousands of projects per business area. The code has been improved to allow this, and to offer better performance.
240898	Feature Enhancement	N/A	Home Page	Home page shortcut buttons	There is a new attribute to Home Page shortcut buttons named CSS. If you provide a CSS style, then the style overrides the inbuilt button style for the Home Page shortcut button.
242859	Feature Enhancement	N/A	Home Page	Added "Report Screen" option to the list of valid start pages	Now that there is a separate button for the Report function to the Query function, the Report Screen has been added as a destination that a user can select when they sign on to ExtraView
242810	Feature Enhancement	N/A	Search / Report	Column reports using the Microsoft Excel (Merge with uploaded file) option enhancements	There are several enhancements to this feature: 1 - Data from ExtraView will no longer overwrite formulas in the destination Excel sheet 2 - The report author may specify a starting row and column for the ExtraView data to be written to the Excel sheet 3 - It is now optional as to whether the column titles from ExtraView should be written to the Excel sheet
242551	Feature Enhancement	N/A	User Custom	Provide access to the CC recipient list	There is a new EVMail configuration property named EVMAIL_CC_UDF. This can be set to the name of a user defined field. When this is done, the CC notification list is added to this field.
242040	Product Bug	6.6.3	API & CLI	Link within signon message on the Home Page Ends User Session	This was fixed so that the old behavior was reinstated
242375	Product Bug	6.6.2	API & CLI	evadduser - did not allow user to specify User Group in command-line mode	This was a bug that has been fixed.
242427	Product Bug	6.6	Add & Edit	Fields on repeating row did not display	This was a result of a misconfigured site, where the DISPLAY_AS_URL attribute for a field was set, yet there was no URL provided. The behavior has been changed so that this does not cause an error

Release Notes

Issue #	Category	Found In Release	Module	Title	Release Note
242737	Product Bug	7.0	Business Rules	There was a compile error with link rules	A rule such as: {UPDATE: parentLink EXPECTED_COMPLETION_REVISED = EXPECTED_COMPLETION_REVISED}; caused a compilation error. This has been fixed.
242857	Product Bug	7.0	Business Rules	{changed} attribute did not work for Document display type fields	This has been fixed
243106	Product Bug	7.0	Database	Script error in upgrade to 7.0	The size of the SECURITY_USER.LOGIN_ID column was incorrect in the database and an upgrade failed. The column has been increased to the correct value of 128.
242371	Product Bug	7.0	General code issues	Formatting for Text Area Fields in Email Templates Generated From Rules Loses Formatting	This was a bug that was fixed.
242853	Product Bug	6.6.4	Import and Export	Error with LOGIN_ID user field on XML import	This problem was caused by an administrator placing the LOGIN_ID field into the OMITTED_IMPORT_USER_COLUMNS behavior setting. This field cannot be omitted from the XML export procedure. If this field, or the SECURITY_USER_ID field is placed in the OMITTED_IMPORT_USER_COLUMNS setting, they will be ignored.
200737	Product Bug	6.3.1	Layout Editor	Prevent users from puttng Data Dictionary Expression fields on layouts	It was possible to place expression fields on EMAIL and HISTORY layouts, although they would not provide any functionaility there. The code has been altered so it is no longer possible to place these fields on these layouts.
242186	Product Bug	6.5.1.3	Layout Rendering	Layout Configuration Error - was unable to have a Repeating Row field on differently named repeating row layouts in different areas.	This has been fixed
243040	Product Bug	7.0	Layout Rendering	Fields on layouts that are "hidden" with layout cell attributes still get rendered when the permissions are set to Read: Y Write: N	This bug was introduced in 7.0. It has been fixed.
242530	Product Bug	6.6	Perforce Integration	Integration daemon did not work with non-default delimiter	The integration demon no longer worked if a value other than ":" was used in the DEFAULT_TEXT_REPORT_DELIMITER setting. This was fixed.
241265	Product Bug	6.6	Search / Report	SCHEDULED_REPORT_RUN_AS_ROLE setting is deprecated	This setting is no longer required and has been removed from the database
242787	Product Bug	6.6.4	Search / Report	XML Export / Import did not correctly handle nested report folders	This problem manifested itself during an upgrade from 6.6.4 to 6.6.5. The problem with the XML export / import not handling report folders correctly has been resolved.

Count: 21 records
