

ExtraView 10.1

Key New Features

This document is provided to ExtraView's customers under non-disclosure and for information purposes only. Its contents must not be shared with third parties without the permission of ExtraView Corporation.

This document is not a full list of new features in the release. See the documentation and release notes for complete information.

Workflow

- **Auto-complete has been extended to work on multi-valued list and multi-valued user fields**
- **The administrator may configure a user's job title to appear within user search popups**
- **Improved usability of the Print Page buttons**

Reports

- **Improvements to the sharing of reports**
- **Document repository now supports virtual folders, allowing folders with date information to be created automatically by the report scheduler**
- **PDF reports may now be output in landscape as well as in portrait mode**
- **The results from a summary report can be used to generate a list of values which are passed as successive filters to a Container report, generating a separate report within the Container for each of the values**
- **Ability to group on multiple levels of a hierarchy filter within matrix and summary reports**

Reports (Continued)

- **Saved filters have been enhanced to allow them to be added as filters within any report editor, either replacing existing filters or adding to the existing filters**
- **Advanced filters may be saved with the * Any * value, simplifying the creation of complex reports**
- **The statistical columns Min, Max, Mean, Percent and Total may now be sorted on the output of matrix reports**
- **The statistical columns Min, Max, Mean, Percent and Total can be added individually into the output of matrix reports, and the user can select the precision with which to display the results**
- **Container Reports run within workspaces that contain runtime filters no longer require a separate browser window**
