

ExtraView 8.0

Key New Features

This document is provided to ExtraView's customers under non-disclosure and for information purposes only. Its contents must not be shared with third parties without the permission of ExtraView Corporation.

This document is not a full list of new features in this release. Please consult the Release Notes at docs.extraview.com for complete details of all new features and bug fixes.

Workspaces

- **Support for multiple workspaces, each supporting a different business area / role**
- **Drag-and-drop capability between panels, e.g. drag multiple open issues from one report onto a report of closed issues, to change the open issues to closed issues**
- **Reports auto-refresh, providing up-to-date results**
- **Significantly improved performance**
- **Improved workspace management**
- **Virtualized panels, offering workspaces many times larger than the browser window**

Workspace Interface

Ideal power-user multi-tasking interface

Workflow

- Fully customizable navigation bar, including drop-down sub-menus – actions such as Add / Run Report available on any navigation item
- Attachment thumbnails displayed immediately
- Thumbnails displayed for all file types
- Additional workflow options for document and image field types
- Ability to create a search layout within an add / edit screen, and to communicate results back to the parent issue
- Support for external document repositories such as Dropbox, Box, SkyDrive
- New integrations with LinkedIn, Jira

Customizable navigation bar – any buttons, drop-down sub-menus

Reporting

- **New Taskboard report type – displays issues on a matrix and allows dragging and dropping of issues to update the issues within the matrix**
- **Column reports now offer the record selector mechanism to mark and select multiple issues for operations such as drag-and-drop and mass update**
- **Quickfind enhancements for keyword searching – phrase searching, like terms, near terms, fuzzy matching**
- **Ability to fill out PDF documents without custom code**
- **Hover mouse over View buttons to see issue information, without the need to drill down**

Taskboard Reports

Drag-and-drop issues to change values, inline editing of values on report
