

Release Notes for ExtraView 12.0.1

9/7/18

ExtraView 12.0.1 Release Notes
Feature Enhancements

Module: Add & Edit		
Issue #	Title	Release Note
364728	New layout cell attribute for shaded regions to control the border style	A new HTML MODIFIER can be added as a layout cell attribute to shaded regions to control the color and style of its border. The name is BORDER_STYLE and you may add this with an entry such as BORDER_STYLE:border: 2px solid #cc0000
		Count: 1 rows

Module: Administration		
Issue #	Title	Release Note
364329	Increased character limit with the Help URL field within the data_dictionary	The number of allowed characters has been increased from 100 to 1000 characters in the data dictionary for the Help URL field
		Count: 1 rows

Module: Search / Report		
Issue #	Title	Release Note
362491	Allow summation of multiple fields on a single summary report	This new feature allows the user to sum multiple fields on a summary report. The columns can be displayed in any convenient order for the end user's purpose.
353412	Summary Reports have been enhanced to support 20 fields	This is a minor enhancement
353408	Ability to include report attributes at runtime	Within each report editor there is a fold at the bottom of the screen. When the user accesses this fold, there are a range of checkboxes which reflect the options for that report. When an additional option is checked, the popup screen with the runtime selections for that report will present the option so the user may alter the setting of the option without needing to return to the report editor.
345686	Summary, Matrix, and Chart reports now include the "exclude parents with children option"	This option has been extended from column reports to work with summary and matrix reports, as well as charts
333500	The ability to search for the non-existence of child records in a relationship group	There is a new option for reporting with hierarchies, to both include and/or exclude parent records that do or do not have child records.
		Count: 5 rows
		Total Count: 7 rows

ExtraView 12.0.1 Release Notes
Fixed Bugs

Module: Notification			
Issue #	Found in Release	Title	Release Note
363572	12.0	Clickable "mailto" links did not work within Chrome browsers	Chrome browsers used a non-standard approach within their support of the "mailto" link. We have made an accommodation for the Chrome browser to support this link.
			Count: 1 rows

Module: Search / Report			
Issue #	Found in Release	Title	Release Note
364342	12.0	Alt titles on fields within child levels of hierarchical reports were not being saved	Alt titles on fields that were not at the base level of a hierarchy report were not being saved with the report. This has been fixed.
364328	12.0	The Conditional Formatting "between" operator has been removed for everything except date fields	This option was mistakenly provided within the user interface for the new feature in the 12.0 release.
364257	12.0	The Edit button within trees was not always visible	This problem only occurred on a single customer site, due to an unusual configuration of their web server. It has been fixed.
363892	12.0	A "data error" popup message and an error was observed in the log when running a TreeGrid report	This only happened after a user error, when a Treegrid report was run without defining a reporting hierarchy. By definition, hierarchies are required within a Treegrid report. The user interface has been altered to make the selection of a reporting hierarchy required.
			Count: 4 rows

Module: XML Import and Export			
Issue #	Found in Release	Title	Release Note
363889	12.0	The XML import hung upon updating the application_default table	This problem was only observed in a single customer's site. It has been fixed.
363888	12.0	The XML import feature threw a SQL error on ev_hierarchy_level	This was an error within the XML import into a Microsoft SQL Server database only. The problem has been fixed
