

6.5.1.2 Release Notes

Prepared - 2/6/11 5:41 PM

Release Notes					
Issue #	Category	Found In Release	Module	Title	Release Note
230459	Feature Enhancement	N/A	Search / Report	Optionally suppress report header / footer information on scheduled reports	Generated reports include a list of the filters that were used to generate the report at their head, and some reports (depending on the report output) also contain a count of the number of records. Depending on the context of the recipient of scheduled reports, this information sometimes did not mean anything (e.g. a guest user receiving a scheduled report with several filters on fields to which they did not have any access or context), so a new option to suppress the filters has been introduced when reports are being scheduled.
228722	Product Bug	6.5.1.1	Add & Edit	Could not add any new issues into database	After upgrading from the 6.5.1.1 minor release it was not possible to add any new issues to the database, when the add layout did not contain a repeating row layout. The ability to add multiple repeating rows to layouts caused a problem when no repeating row layouts were present. This has been fixed.
230451	Product Bug	6.5.1.1	Rules Engine	Business Rules with list assignments to {null} would not compile	This problem was introduced in 6.5.1.1.1 and was fixed. It only affected rules where a null value was assigned to a list field.
230627	Product Bug	6.5.1.1	Rules Engine	NullPointerException in Rule.java has been fixed	This was connected to running escalations and then seeing a null pointer in the log file, but with no rules being executed. This bug has been fixed.
228707	Product Bug	6.5.1	Search / Report	Scheduled Reports - "Error on page" was displayed when selecting a user role from the select list	This was a minor problem that has been fixed.
Count: 5 records
