6.5.1.5 Release Notes

Prepared - 3/27/11 2:23 PM

Release Notes					
Issue #	Category	Found In Release	Module	Title	Release Note
235676	Feature Enhancement	N/A	Home Page	New user exit implemented on the home page to enable rendering content at the bottom of the page	The new user custom method signature is ucRenderHomePageAfter(SesameSession session). This allows the rendering of additional content on the home page when ABBREVIATED_HOME_DISPLAY is set to YES.
235617	Product Bug	6.5.1.4	API & CLI	The API update command replicated field values from the first inserted repeating row	This occured when several successive inserts were made through the API, and there were null values provided in fields in the second and subsequent rows, but the first row had a value for that field. The problem has been fixed.
235249	Product Bug	6.5.1.3	Add & Edit	Value with parentheses in a popup list generated an error with the autocomplete option	This was fixed.
235142	Product Bug	6.5.1.3	General code issues	Error in log when starting server and ExtraView was deployed as a WAR file	This did not affect the operation of ExtraView, but the error in the log has been suppressed.
235538	Product Bug	6.0.4	General code issues	Issue with UTF-8 characters in user names	This issue only occured with users whose names had accented characters, and these users were inserted into ExtraView as a result of an upsert from SSO. This has been fixed.
235622	Product Bug	6.5.1.3	Import and Export	XML migration with "RID_FILTER" element attribute fails to correctly move the underlying layout data	This was an issue when the underlying database was MySQL and there were related issue display layouts that contained filters. In these circumstances the data was not migrated correctly to the target database. This has been corrected.
235636	Product Bug	6.5.1.4	Search / Report	Runtime filters on Date field were not working when runtime filter was null	With a runtime filter set at "between" two dates, and both dates were left empty, there would be an exception in the log file and no report was generated. This was fixed.
